1. The Homepage Layout

Designed to prompt immediate culinary exploration with rapid search capabilities and rich category matrices.

UX Engineering Notes for Homepage:

- **Sticky Navigation Header:** Ensures persistent access to the shopping cart, decreasing checkout abandonment.
- **Contextual Hero Search:** Auto-suggests based on real-time keystrokes & previous user histories.
- **Category Tab Row:** Triggers instantaneous asynchronous item sorting without full-page reloads.

2. Restaurant Menu & Interactive Cart

A split layout engineered to keep menu navigation fluid while maintaining full visibility over current cart states.
